A Note to Parents and Teachers

DK READERS is a compelling reading programme for children, designed in conjunction with leading literacy experts, including Cliff Moon M.Ed., Honorary Fellow of the University of Reading. Cliff Moon has spent many years as a teacher and teacher educator specializing in reading and has written more than 140 books for children and teachers. He reviews regularly for teachers' journals.

Beautiful illustrations and superb full-colour photographs combine with engaging, easy-to-read stories to offer a fresh approach to each subject in the series. Each DK READER is guaranteed to capture a child's interest while developing his or her reading skills, general knowledge, and love of reading.

The five levels of DK READERS are aimed at different reading abilities, enabling you to choose the books that are exactly right for your child:

- Pre-level 1:** Learning to read
- Level 1:** Beginning to read
- Level 2:** Beginning to read alone
- Level 3:** Reading alone
- Level 4:** Proficient readers

The “normal” age at which a child begins to read can be anywhere from three to eight years old, so these levels are only a general guideline.

No matter which level you select, you can be sure that you are helping your child learn to read, then read to learn!

A Trip to the Dentist

Written by Penny Smith

“Come on, get your coats,”
called Mom.

Sarah and her brother, Josh,
tumbled into the room.

“It’s time to go
to the dentist
for your checkups,”
said Mom.

Soon they arrived at
the dentist's office.
Mom told the receptionist
their names.

“I want my teeth
to stay strong and
white like Rabbit's,”
Josh told her.

The children played in the waiting room until it was time for their checkups.

Then the dentist
took them into the
examination room.

“Hi,” he said.

“My name is Dr. Richards.”

“Who’s going first?”

asked Dr. Richards.

Josh climbed into the chair
with Rabbit.

The dentist pressed a button
and the chair tipped
slowly backward.

“Open wide,” said Dr. Richards.
First he checked Josh’s gums.

Then he used a small mirror
to look for holes called cavities
in Josh’s teeth.

He didn’t find any cavities.

“You need to take extra care of the molars at the back of your mouth,” he said.

“Right now there is a sticky layer on them.

This is called plaque.

It can cause cavities, so you need to brush it away.”

Dr. Richards
showed Josh a good
way to brush.

toothbrush

“Squeeze a pea-sized blob of toothpaste onto your toothbrush. Then gently brush in little circles,” he said.

Josh tried brushing Rabbit's teeth.
"How often do you brush
your teeth?" asked
Dr. Richards.

“Every day, I think,” said Josh.
“You should brush twice a day,
once in the morning and once
before you go to bed,” said
Dr. Richards.

incisors

Then it was
Sarah's turn.
"You've lost six
of your baby teeth,"
said Dr. Richards.

“New incisors are growing at the front. Soon your other baby teeth will get wobbly and fall out. You’ll have 32 new teeth in all.”

Then Dr. Richards found a little cavity in one of Sarah's teeth.

“I'm going to put a filling here,” he said.

“A filling is a kind of paste that dries hard. It will keep the cavity from getting bigger and giving you a toothache.”

First Dr. Richards cleaned out the cavity using a drill. His assistant, Carol, used a suction tip to suck out any saliva, or spit.

Then she gave Sarah
a cup of water to
rinse out her mouth.

Next Dr. Richards used an air jet to blow air into the cavity. This dried the cavity so the filling would stick.

Then he pushed the filling
neatly into the cavity.
“All done,” he said.

Then Dr. Richards pointed to a chart. It helped explain how to prevent cavities. “Don’t have sugary drinks or candy very often, and brush your teeth twice a day,” he said.

candy

As they were leaving,
Dr. Richards gave Sarah and Josh
each a sticker of a smiling rabbit.

sticker

The sticker said,
“To keep your teeth
sparkling clean and bright,
brush early in the morning
and last thing at night.”

And that’s exactly what
they did!
