I Want to Be a
Gymnast

Written by Kate Simkins

DK Publishing, Inc.

Hannah and her friend Jessica dream of being gymnasts one day. They both go to a gymnastics class twice a week and they love it there.

Last week, the girls arrived at the class after school. They put on their leotards in the locker rooms.

Then they ran
around the gym
to warm up.
“I hope I can
take a turn on
the beam today,”
said Hannah
to her friend.

The other girls soon arrived and began running too.

Everyone started jumping and hopping as well.

These exercises warmed them up so that they wouldn't injure themselves in the gym.

“Good!” said Sarah, their coach. “You should be nice and warmed up now!”

Standing tall
Learning how to stand straight and tall helps the girls look more graceful as they do gymnastics.

Next the girls did exercises to stretch different parts of the body. Stretching makes it easier to do gymnastics.

Tyra was very good at forward stretches. She easily touched her toes!

Hannah stretched her feet.

Strong feet are important if you want to be a gymnast.

Then the girls did a straddle.
Their legs were stretched out wide
to the side.

“Keep your back straight and
your head up!” Sarah told them.

Tyra stretched one leg to the front and the other behind.

This is called the splits.

“I tried lots of times before I could do it,” she smiled.

Pointed toes

Gymnasts should try to point their toes.

It makes their legs look longer and straighter.

The girls know they need to be strong if they want to be gymnasts.

Hannah climbed a rope to strengthen her arms.

Look at the amazing shape

Tammy made.

This shape is called a backbend and

is good for strengthening

your arms and legs.

Jessica loved
showing everyone
her somersault.

She tucked
her head and
knees in and
rolled like a ball.

Backward somersaults are harder.
Tammy learned how to do them by
using a sloping springboard
to help her.

“I want to do it again!” she said
after her first try.

“I’m worried
I’ll fall over,”
said Tyra, when
it was time to do
a headstand.

“Don’t worry,
I’ll help you,”
promised Molly.

Handstands

All gymnasts
need to be able
to do handstands.
Molly did
a handstand
without anyone
helping her.

Molly held Tyra
as she balanced
on her hands
and head, then
straightened
her legs.

“I did it!”
Tyra smiled.

“Can I go on the beam yet?” asked Hannah.

“Maybe later,” Sarah replied.

“Try a cartwheel first.”

The girls used a bench to learn how to do a cartwheel. They tried to keep their legs straight.

Then they tried it on the floor.
Jessica was really good.
She did four cartwheels in a row.

“It’s funny being upside down!”
she laughed.

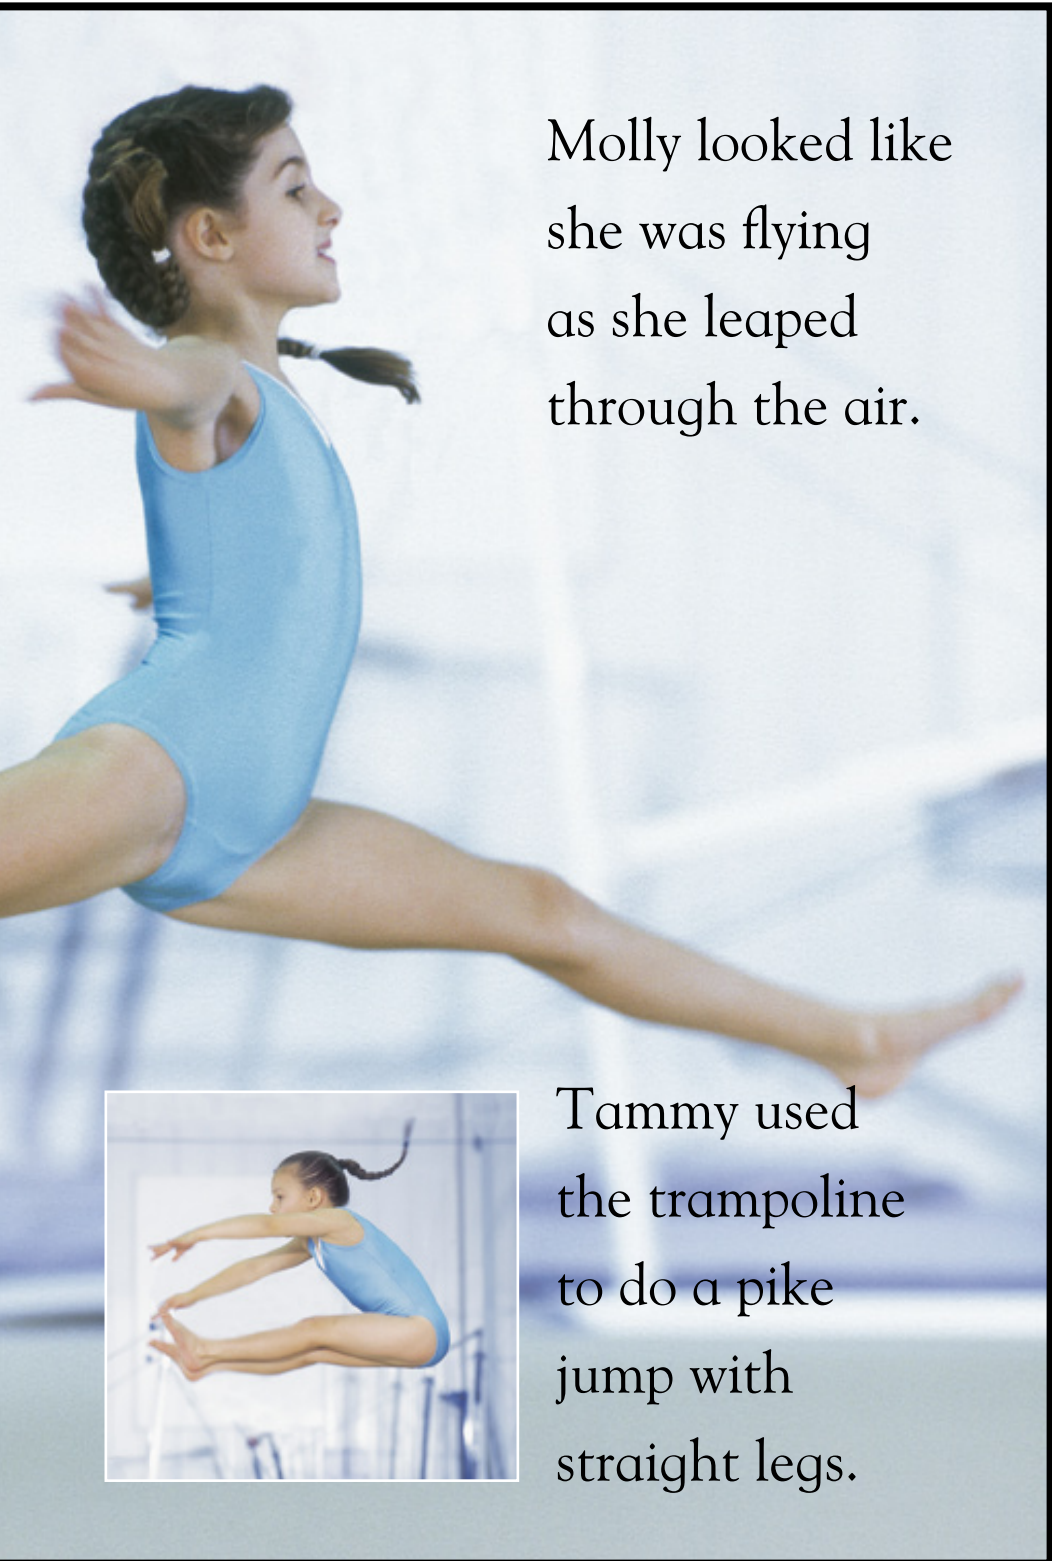

All the girls really enjoyed jumping and leaping.

It was exciting to see how high they could jump and how far they could leap.

The trampoline

The trampoline is really bouncy and gives you time to make shapes in the air.

Molly looked like she was flying as she leaped through the air.

Tammy used the trampoline to do a pike jump with straight legs.

“Who wants to try the vault?”
asked Sarah.

“I do,” cried Jessica, “but
it looks really high!”

Sarah showed her how to take off
from the springboard.

When she was ready,
Jessica sprang onto
the vault.

Straddle jump

A straddle jump is like leapfrog. Your legs are lifted high and wide above the vault.

She landed on the top and straddle jumped off again.

The girls were looking forward to swinging on the uneven parallel bars. First they covered their hands in chalk to keep them from slipping.

Handguards

Special covers are worn on your hands to stop them from getting blisters.

Molly hung from the higher bar. She really enjoyed swinging backward and forward.

“Watch me stand on the bar!” said Tyra as Katie helped her balance.

“Hurrah! It’s the beam,”
cried Hannah.

Hannah showed
what she could
do on the beam.

She balanced on
one leg and
pointed her toes.

The beam

The beam is only
4 inches (10 centimeters)
wide. Top gymnasts
can even do
jumps on
the beam.

Jessica, Tammy, and Tyra walked
along the beam.

It was hard not to wobble!

The lesson was over and the girls talked about what they had learned.

Good Job!

After a few months of lessons, all the girls did well enough to get their Certificates of Achievement.

Although the girls were very tired,
they still had enough energy
to jump in the foam pit!

Hannah and Jessica love going to the gymnastics class.

They have made lots of new friends.

If they work really hard, they will get better and better.

“I hope to be a champion gymnast one day,” said Hannah.

“Perhaps we will even compete in the Olympic Games!” added Jessica.

But the most important thing is that they are having lots of fun!

Gymnastics Facts

Both female and male gymnasts take part in competitions. The biggest competition is the Olympic Games.

One of the most famous gymnasts was Nadia Comaneci. She was the first gymnast to score a maximum 10 points at the Olympics.

The vault is also called a horse. It was first used by Roman soldiers to practice getting on their horses.

The uneven parallel bars are two bars. One is about 5 feet (1.5 meters) high. The other is about 7½ feet (2.3 meters) high.

A Note to Parents and Teachers

DK READERS is a compelling reading program for children, designed in conjunction with leading literacy experts, including Dr. Linda Gambrell, Professor of Education at Clemson University. Dr. Gambrell has served as President of the National Reading Conference, College Reading Association, and has recently been elected to serve as President of the International Reading Association.

Beautiful illustrations and superb full-color photographs combine with engaging, easy-to-read stories to offer a fresh approach to each subject in the series.

Each DK READER is guaranteed to capture a child's interest while developing his or her reading skills, general knowledge, and love of reading.

The five levels of DK READERS are aimed at different reading abilities, enabling you to choose the books that are exactly right for your child:

Pre-level 1: Learning to read

Level 1: Beginning to read

Level 2: Beginning to read alone

Level 3: Reading alone

Level 4: Proficient readers

The "normal" age at which a child begins to read can be anywhere from three to eight years old, so these levels are only a general guideline.

No matter which level you select, you can be sure that you are helping your child learn to read, then read to learn!
