All About Spiders

by Stephanie Herbek

This is a spider.
A spider creeps
and crawls
on eight legs.

Most spiders eat bugs.
Some spiders build webs
to trap the bugs.

The webs are sticky.
The bugs get stuck
in the sticky webs.

Not all spider webs
look the same.
This spider makes
a round web.
It looks like a circle.

This spider makes
a very messy web.

Some spiders make
tube webs.
This web has a door!

Some spiders do not make webs at all. These spiders hunt for bugs, and then they grab them.

This spider eats tiny fish.
The spider has long,
thin legs.

It can walk on water
and not sink.

Then it can dive down
to get a fish!

More Spider Facts

 Most spiders have eight eyes.

 Baby spiders hatch from eggs.

 All spiders can make a string of silk.

 Some very big spiders eat mice and birds.
